Line following competition
3rd in "Best Presentation in English", 10th overall

April 2026

LF Rescue Unit is joined by Ivan

April 2026

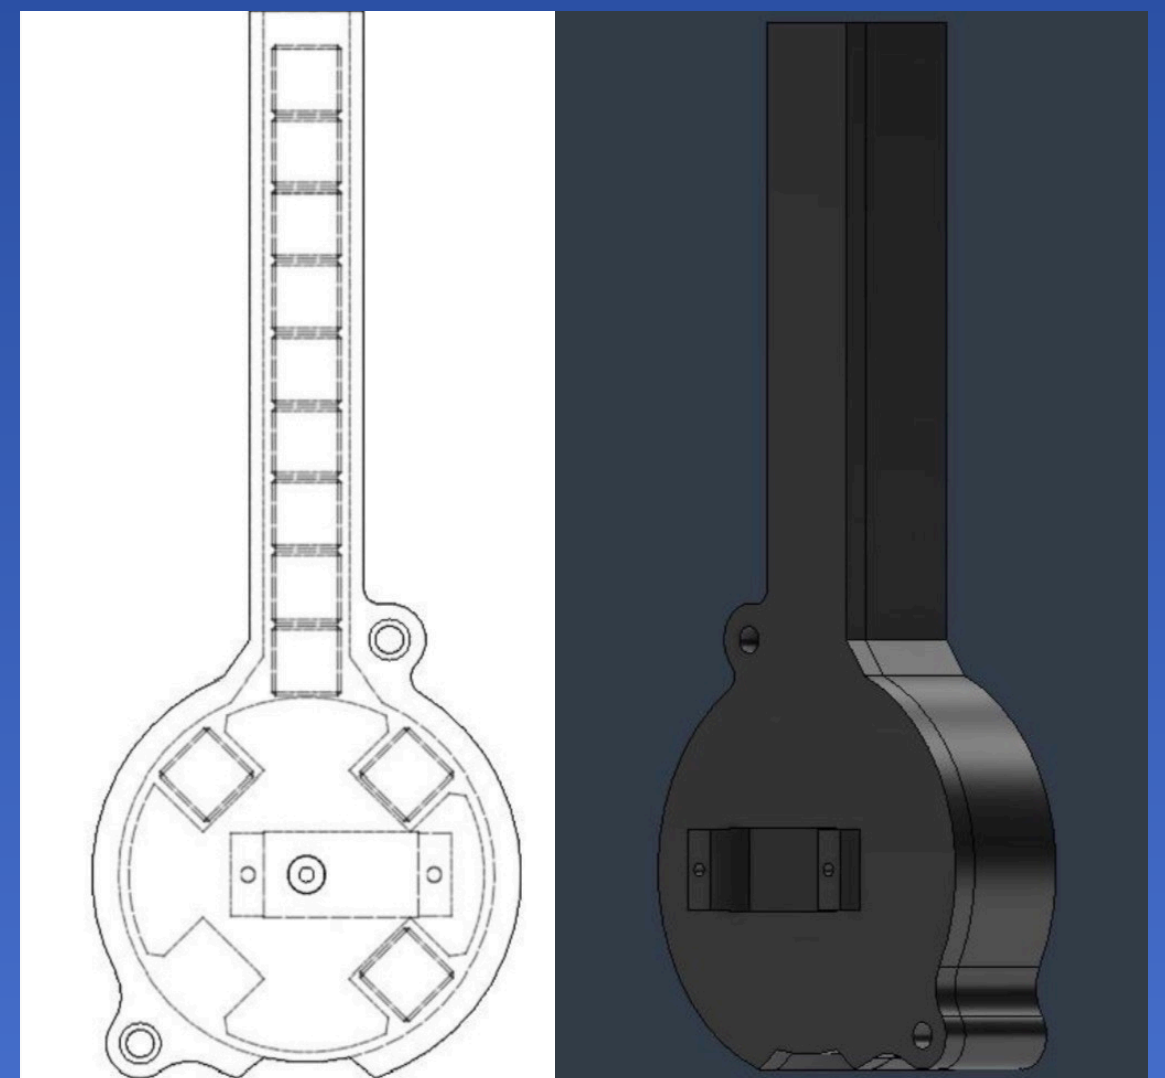

First place in the RoboCup Portugal Open 2026.

Present

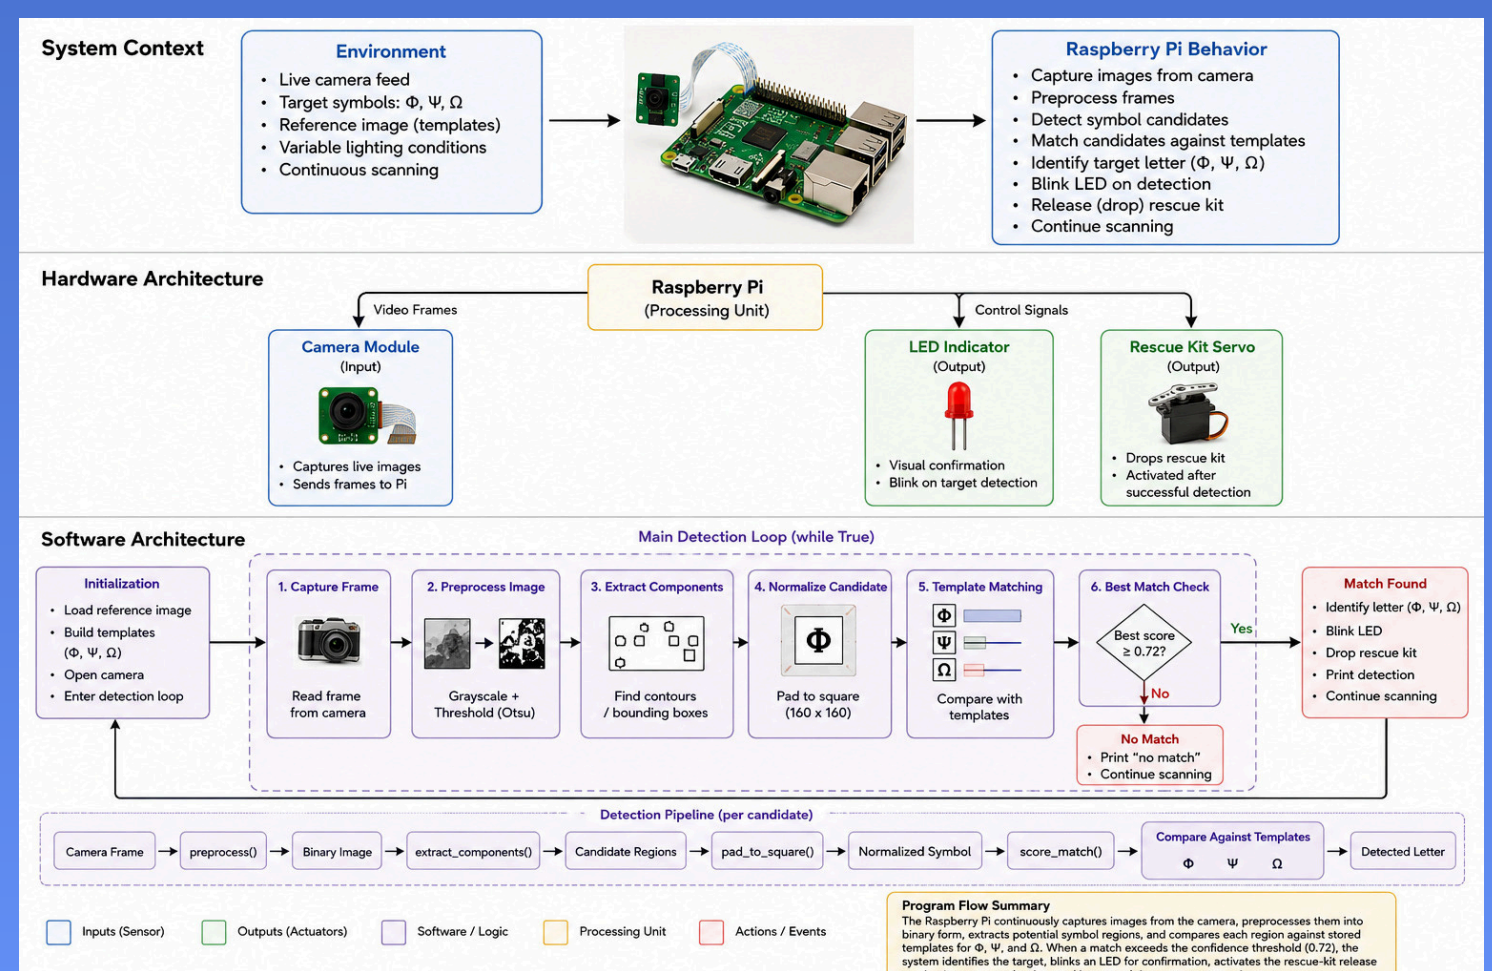

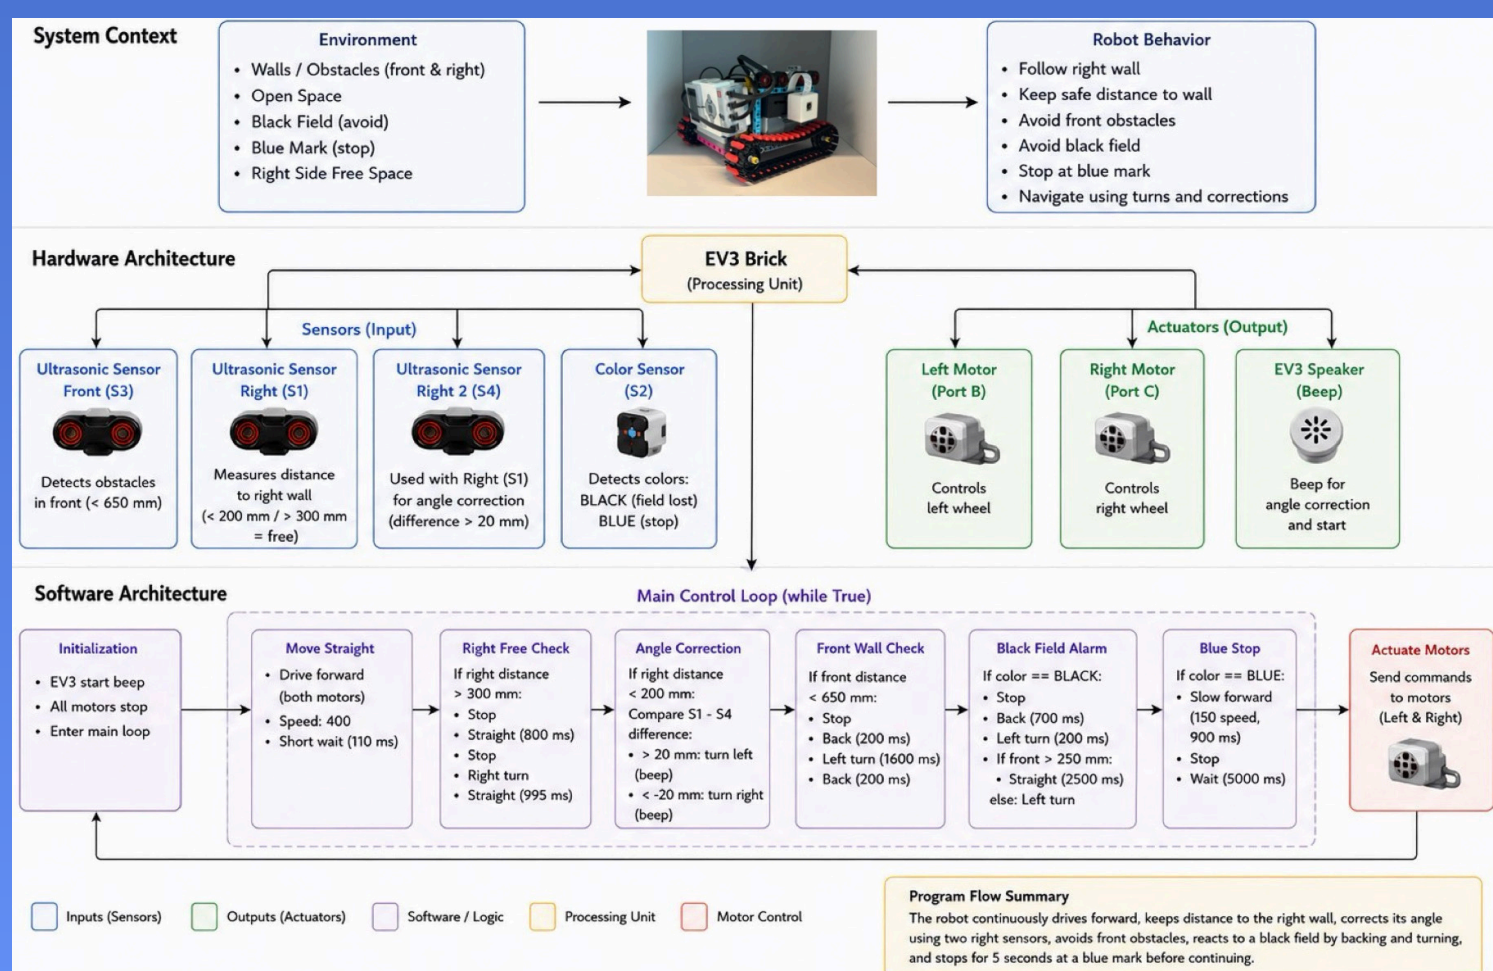

RoboCup 2026 Incheon

Hardware & software solutions

- **Combination of LEGO EV3 and Raspberry Pi**
 - **EV3 Brick:** runs MicroPython and is responsible for navigation through motor control and sensor processing
 - **Raspberry Pi:** runs Python + OpenCV for camera-based victim detection and servo control.
- **Custom 3D-printer rescue kit deployer:**
 - Gravity-assisted feeding
 - Rotary base housing with a **servo-controlled** release mechanism which aligns the opening to dispense a predefined number of kits

System architecture overview – EV3 & Raspberry Pi
