

RESCUE JUNIOR - Bill of Materials (BOM)

Team name: RM

Every Line/Maze team has to submit a bill of materials for their robot

Instructions:

RM
"The team's name should be entered in the Author column as this module is a custom, self-developed algorithm. The a_star.py software is a proprietary Python implementation of a 4-directional A* pathfinding algorithm that uniquely integrates a preference_grid for wall avoidance and an OpenCV-based visual debugging system, making it an entirely original solution created by the team."

Team name:

#	Name	Software's Tool/Library
